Work Experience

- Nference

Data Analyst Intern | Python, Clickhouse SQL, Excel, Fast API, LLM

Nov 2025 - Sep 2026

Banaglore

- Orchestrated **End to End Pipelines** within a 21-member team, synchronizing technical requirements across 6 departments (Product, Dev, Clinical) to ensure 100% alignment on project milestones and daily delivery targets.
 - Executed daily data extraction and cleaning on 3M - 7M+ rows using **ClickHouse SQL** and **Python**, applying complex **RegEx patterns** to structure unstructured clinical data with high precision and reporting daily progress metrics.
 - Utilized **Internal LLM architectures** to verify analytical results against raw clinical notes, achieving clinical-grade accuracy by cross-referencing data at both the individual patient and note level.
- Hindustan Zinc Limited, Vedanta

Process Analyst | MySQL, Excel, Python, PPT

Sept 2023 - Oct 2024

Bhilwara, Rajasthan

- Collaborated with **5+** cross-functional teams in data-driven projects, managed KPIs, monitored and reported daily performance reports led to increase in transparency and accuracy in reporting processes
 - Executed advanced **SQL** queries using **CTEs** and **Window functions** to analyze process data, optimize **Process** and **Production** performance.
 - Overhauled flotation process to improve metal recovery: Zn from 90.34% to 91.8%, Pb from 62.6% to 64.8% Ag from 32% to 38% ,also decreased overall consumption of Electricity and fresh water by 5%.

Projects

- Clinical Analytics RECIST-Based Efficacy Studies in NSCLC

Nov 2025 - Jun 2026

- Successfully identified and curated a multi-AMC cohort of 340 NSCLC patients, enabling a comparative effectiveness study of Durvalumab to support the strategic launch of a competing therapeutic product.
 - Built and optimized high-performance data extraction workflows using SQL and Python, managing and cleaning 7M+ rows of multi-modal clinical, treatment, and imaging data to ensure 100% data integrity.
 - Developed a complex analytics framework using Pandas & other libraries to automate RECIST v1.1 criteria, calculating complex metrics including Sum of Diameters and Point of Failure across 35 K tagged images.
- Player Funnel and Profitability Analysis

May 2025

- Built player **funnel (Registration → Deposit → Bet → Active 30 Days)** identifying **56%** drop-off at deposit stage using **Python & SQL**.
 - Analyzed engagement cohorts and time gaps, improving **Retention** visibility through cohort segmentation.
 - Segmented players by deposits; **top 10%** contributed **54.5%** of total deposits, highlighting profitability concentration.

Skills

- Programming Languages : Python(Advanced level), MySQL & PostGre SQL (Advanced Level).

Tools & Skills: MS Excel/Word/PPT, Power BI, Numpy, Pandas, Matplotlib, Seaborn, Scikit-learn, Arima/Prophet, Data Visualization, Data Mapping & Dashboards, ETL, **Conversion, Retention, Funnels**, ChatGPT/Gemini, GIT, Fast API.

Soft skills : Team Collaboration, Time-Management, Leadership, Aptitude, Communication, Analytical Thinking, Problem Solving, Client Engagement, Requirement Gathering, Stakeholder Management.

Statistical Modeling:- Clustering, Regression, ML concepts, Hypothesis Testing, A/B Testing, Time Series Forecasting.
- ## Certifications
- HackerRank: Certificate of accomplishment in SQL(ADVANCED) Test

Nov 2024
- ## Extra-Curricular Activities
- Volunteer - Red Cross Blood Bank Society Participated in and managed a blood donation drive.
